

We are
looking for a
Developer

CoLAB TRIALS is a collaborative laboratory dedicated to bringing innovation to clinical trials.

We bring together hospitals, universities, and companies to drive clinical research.

Our mission? **To enhance innovation by adding value to health technology products.**

We are looking for a **Junior Developer** to join the team of the **TRIALS READY** project.

If you want to take your first steps in your career within a collaborative and innovative team, this opportunity is for you!

What do we offer you?

Integration into a dynamic and motivated team, where collaboration is the key to success. Continuous training and networking with professionals who are transforming the healthcare sector in Portugal.

The opportunity to work in an interdisciplinary environment alongside experts in clinical trials, innovation, and technology.

What are we looking for in you?

- A degree in Computer Engineering or a related field.
- Programming skills with experience in Python or JavaScript.
- Focus on scalable solutions and collaboration using tools like Git.
- Familiarity with agile methodologies for project management and delivery.
- B2-level English (independent user).
- Strong communication skills and ability to work in a team.

Valued:

- Experience in software development and automation;
- Experience with open-source frameworks like Django or React

Your main responsibilities:

- Integrate the developed tools into the TRIALS READY platform.
- Develop software to support the implementation of new solutions.
- Implement an innovation management tool.
- Conduct unit testing to ensure the quality of the developed solutions.

If you want to be part of an innovative project and contribute to the digital transformation of clinical trials, send us your application with Ref: **Prog022025-CLT** (CV and motivation letter) to geral@colabtrials.pt by **March 7th, 2025**.
